Mineralogical Society of America

ASSOCIATED WITH THE GEOLOGICAL SOCIETY OF AMERICA

President: **D. Jerome Fisher,** University of Chicago, Chicago 37, Illinois.
Vice-President: **George E. Goodspeed,** University of Washington, Seattle 5, Washington.
Secretary: **C. S. Hurlbut, Jr.,** Harvard University, Cambridge 38, Massachusetts.
Treasurer: **Earl Ingerson,** U. S. Geological Survey, Washington 25, D. C.
Editor: **Lewis S. Ramsdell,** University of Michigan, Ann Arbor, Michigan.
Councillors: **Felix Chayes,** Geophysical Laboratory, Washington, D. C.
Leonard G. Berry, Queen's University, Kingston, Ontario, Canada.
Chester B. Slawson, University of Michigan, Ann Arbor, Michigan.
Alfred O. Woodford, Pomona College, Claremont, California.
Samuel S. Goldich, University of Minnesota, Minneapolis 14, Minnesota.
Brian H. Mason, American Museum of Natural History, New York 24, New York.
Clifford Frondel, Harvard University, Cambridge, Massachusetts.

The enlarged issues of this journal for 1957 are made possible by a grant from the Penrose Fund of the Geological Society of America.

MINERALOGICAL SOCIETY OF AMERICA* MEMBERSHIP AND SUBSCRIPTION INFORMATION

Membership: Membership in The Mineralogical Society of America is open to persons interested in the fields of mineralogy, petrography, crystallography and allied sciences. Prospective members should obtain an application blank from the Treasurer. Upon the return of the blank to the Treasurer, properly filled out and accompanied by a remittance of $4.00 for annual dues, his name will be added to the mailing and membership list. Membership includes receipt of the Society's journal, *The American Mineralogist.* Membership is effective as of January of each year and members receive all numbers of the journal for the year. Dues may be remitted directly to the Treasurer or through an agent, payable to The Mineralogical Society of America. No discount is allowed agents on membership dues. Memberships are personal and may not be held in order to obtain the lower rate for the journal for organization use.

Fellowship: Fellows of The Mineralogical Society of America are individuals who have published results of research in mineralogy, petrography, crystallography, or allied sciences, and who, upon nomination by the Council, are elected. Fellowship dues are $5.00 annually and may be remitted in the same manner as membership dues.

Subscriptions: Subscriptions to *The American Mineralogist* are available to libraries, colleges, institutions, companies, and similar organizations. Subscriptions are accepted for the calendar year (January-December) only and for not less than one year. For orders placed during the year, back numbers from January are supplied after the subscriber is placed on the mailing list. The annual subscription rate is $6.00 U.S. funds. The usual 10% discount is allowed dealers and agents who remit payment with the order. No discount is allowed when an invoice is requested. All orders, checks, and drafts are to be made payable in U.S. dollars to The Mineralogical Society of America, and sent to the Treasurer. The name and address of the subscriber to whom the Journal is to be sent and for whom remittances are made should be very clearly indicated. Agents who wish the subscription sent through them should indicate for whom it is ordered.

MINERALOGICAL SOCIETY OF AMERICA
Earl Ingerson, Treasurer,
U. S. Geological Survey, Washington 25, D.C.

* A printed Constitution and By-Laws of the Society will be found in Vol. 35, pp. 611-613 (1950).

CONTENTS OF VOLUME 42

NOS. 1 AND 2, JANUARY–FEBRUARY

Studies on the chrysotile and antigorite components of serpentine. George L. Kalousek and Lawrence E. Muttart 1

X-ray determination of the dolomite-calcite ratio of a carbonate rock. C. B. Tennant and R. W. Berger 23

Brannerite from San Bernardino County, California. D. F. Hewett, Jerome Stone, and Harry Levine 30

The thermal expansions of thoria, periclase and diamond. Brian J. Skinner 39

Ginorite and sassolite from Death Valley, California. Robert D. Allen and Henry Kramer 56

Epidote from Hawleyville, Connecticut. Davis M. Lapham 62

Fassaite from near Helena, Montana. Adolph Knopf and Donald E. Lee 73

A new method of differential thermal analysis employing multiple thermocouples. William Lodding and Edward Sturm 78

New data on ferritungstite from Nevada. D. H. Richter, Laura E. Reichen, and D. M. Lemmon 83

Storage of energy in metamict minerals. Sheldon F. Kurath 91

Notes and news: Effects of gamma irradiation on physical properties of minerals. Manuel N. Bass 100

Uranothorite near Forest Home, San Bernardino County, California. D. F. Hewett and Jerome Stone 104

Identification of 14 Å clay mineral component. Tsuneo Tamura 107

Use of the term "alterite". Dorothy Carroll 110

A new occurrence of millerite. C. D. Woodhouse and R. M. Norris 113

Hydrocuprite discredited. George Switzer 115

New mineral names. 117

NOS. 3 AND 4, MARCH–APRIL

Mineralogy of uranium. Clifford Frondel 125

Electron diffraction studies of serpentine minerals. J. Zussman, G. W. Brindley and J. J. Comer 133

Discordant U-Pb ages and mineral type. J. Laurence Kulp and Walter R. Eckelmann 154

Studies of the substitution of OH^- by F^- in various hydroxylic minerals. L. A. Romo and Rustum Roy 165

Bismutotantalite from Brazil. Cornelius S. Hurlbut, Jr. 178

The wurtzite-greenockite series. Cornelius S. Hurlbut, Jr. 184

Some physical properties of naturally irradiated fluorite. Robert Berman 191

Relationship of the minerals avelinoite, cyrilovite and wardite. Marie Louise Lindberg 204

Leucophosphite from the Sapucaia pegmatite mine, Minas Gerais, Brazil. Marie Louise Lindberg 214

Secondary uranium minerals at the W. Wilson mine in the Boulder batholith, Montana. D. O. Emerson and H. D. Wright 222

Memorial of George Harold Anderson. J. L. Gillson 240

Memorial of Norman L. Bowen. J. F. Schairer 242

Memorial of William Frederick Foshag. W. T. Schaller 249

Presentation of the Roebling Medal to Arthur F. Buddington. H. H. Hess 256

Acceptance of the Roebling Medal Arthur F. Buddington 259
Presentation of the Mineralogical Society of America Award to George C. Kennedy J. F. Schairer 262
Acceptance of the Mineralogical Society of America Award George C. Kennedy 264
Presentation of Certificate of Appreciation to the retiring editor of the *American Mineralogist*, Walter F. Hunt Clifford Frondel 265
Proceedings of the thirty-seventh annual meeting of the Mineralogical Society of America at Minneapolis, Minnesota Cornelius S. Hurlbut, Jr. 267
Notes and News: A modified Hull-Davey chart for high values of c/a Cecil J. Schneer 282
Tri-kalsilite, a new mineral Th. G. Sahama and J. V. Smith 286
Order-disorder in kalsilite J. V. Smith and Th. G. Sahama 287
Identity of norcerite and fluoborite Cesare Brisi and Wilhem Eitel 288
Diagrams for the correlation of unit cell edges and refractive indices with the chemical composition of garnets A. Sriramadas 294
Hardness of synthetic diamonds C. B. Slawson 299
Book reviews 303
New mineral names 307

NOS. 5 AND 6, MAY–JUNE

Smythite, a new iron sulfide, and associated pyrrhotite from Indiana Richard C. Erd, Howard T. Evans, Jr., and Donald H. Richter 309
Determination of the composition of plagioclase feldspars by means of infrared spectroscopy C. Sheldon Thompson and Milton E. Wadsworth 334
Kobeite from Paringa River, South Westland, New Zealand C. Osborne Hutton 342
A spectrographic study of the minor element content of diamond F. A. Raal 354
The grinding hardness of diamond in a principal cutting direction Reynolds M. Denning 362
U and Th in accessory allanite of igneous rocks William Lee Smith, Mona L. Franck and Alexander M. Sherwood 367
Larnite, scawtite and hydrogrossular from Tokatoka, New Zealand Brian Mason 379
A technique for the isolation of montmorillonite and halloysite F. C. Loughnan 393
Characterization of β-Ga_2O_3 and its alumina isomorph, θ-Al_2O_3 J. A. Kohn, Gerald Katz and J. D. Broder 398
Sengierite from Bisbee, Arizona C. Osborne Hutton 408
Notes and News: Paragenesis of anthophyllite and hornblende from the Bancroft area, Ontario C. E. Tilley 412
The preparation of petrographic sections with bonded diamond wheels Henry N. Baumann, Jr. 416
Two new types of holders used in grinding thin sections Manning Cochran and A. G. King 422
Genthelvite from Cookstove Mountain, El Paso County, Colorado Glenn R. Scott 425
The crystallography of cerite P. Gay 429
Lineation protractor Lynn McIntosh and Melvin E. Hanes 432
Book reviews 435
New mineral names 440

NOS. 7 AND 8, JULY–AUGUST

Differential thermal analysis of sulfides and arsenides. Otto C. Kopp and Paul F. Kerr 445
Duttonite, a new quadrivalent vanadium oxide from the Peanut Mine, Montrose County, Colorado. . . . M. E. Thompson, Carl H. Roach and Robert Meyrowitz 455
A structural study of the thermal transformation of serpentine minerals to forsterite G. W. Brindley and J. Zussman 461
Olivine x-ray determinative curve. H. S. Yoder, Jr. and Th. G. Sahama 475
X-ray fluorescence as applied to cyrtolite. Dorita A. Norton 492
Aluminian ferroanthophyllite from the Kitakami Mountainland, Northeastern Japan Yôtarô Seki and Masao Yamasaki 506
Crystallography and x-ray measurements of howlite from California. Joseph Murdoch 521
The nature of iddingsite in some basaltic rocks of New Mexico. Ming-Shan Sun 525
Experimental error in determining certain peak locations and distances between peaks in x-ray powder diffractometer patterns. F. Chayes and W. S. MacKenzie 534
A thermal increment diffractometer. William A. Bassett and Davis M. Lapham 548
Piezobirefringence in diamond: further results. R. M. Denning, A. A. Giardini, Edward Poindexter and C. B. Slawson 556
Notes and News: A note on calcite-aragonite equilibrium. . . . Sydney P. Clark, Jr. 564
Fuchsite from a Silurian (?) quartz conglomerate, Acworth Township, New Hampshire. Tom N. Clifford 566
Determination of (060) reflections of clay minerals by means of counter type x-ray diffraction instruments. C. I. Rich 569
Large angular aperture and useful interference figures. Horace Winchell 570
Book reviews. 574
New mineral names. 580

NOS. 9 AND 10, SEPTEMBER–OCTOBER

Doloresite, a new vanadium oxide mineral from the Colorado plateau. T. W. Stern, L. R. Stieff, H. T. Evans, Jr. and A. M. Sherwood 587
The crystal structure of uranophane $[Ca(H_3O)_2](UO_2)_2(SiO_4)_2 \cdot 3H_2O$. Deane K. Smith, Jr., John W. Gruner and William N. Lipscomb 594
Nolanite, a new iron-vanadium mineral from Beaverlodge, Saskatchewan. S. C. Robinson, H. T. Evans, Jr., W. T. Schaller and J. J. Fahey 619
Synthesis, stability and polytypism of nickel and gallium phlogopite. Cyrus Klingsberg and Rustum Roy 629
Andalusite- and corundum-bearing pegmatites in Yosemite National Park, California Robert L. Rose 635
Pyrite-uraninite polycrystal. A. G. King 648
Umohoite from the Lucky Mc Mine, Wyoming. Robert G. Coleman and Daniel E. Appleman 657
Notes and News: Alluaudites and varulites. D. Jerome Fisher 661
Lattice constants from Weissenberg patterns. A. Pabst 664
Serpentines with 6-layer ortho-hexagonal cells. J. Zussman and G. W. Brindley 666
Rare earths and thorium in lyndochite. J. R. Butler 671
X-ray powder data for ulexite and halotrichite. Gretta S. Baur and L. B. Sand 676

Stages in the oxidation of magnetite....Henry Lepp 679
The separation of clay minerals from carbonate rocks....
....Satyabrata Ray, H. R. Gault and Charles G. Dodd 681
Titanclinohumite from the Wichita Mountains, Oklahoma....W. T. Huang 686
Technique for thinned polished sections....Alan G. King 689
An apparatus for hand-picking mineral grains....M. V. N. Murthy 694
Image projection by fibrous minerals....
....G. S. Baur, W. N. Larsen and L. B. Sand 697
The hydration of kernite....Siegfried Muessig and Robert D. Allen 699
Book reviews.... 702
New mineral names.... 704

NOS. 11 AND 12, NOVEMBER–DECEMBER

The role of lead and excess oxygen in uraninite....Robert M. Berman 705
Absorption spectra of some silicates in the visible and near infrared....
....Sydney P. Clark, Jr. 732
The geochemistry of germanium in the oxidized zone of the Tsumeb Mine, South-West Africa....Clifford Frondel and Jun Ito 743
Synthesis of tourmaline by reaction of mineral grains with $NaCl$-H_3BO_3 solution, and its implications in rock metamorphism....Clifford Frondel and R. L. Collette 754
Hydrothermal synthesis of zircon, thorite and huttonite....
....Clifford Frondel and R. L. Collette 759
Luzonite, famatinite and some related minerals....Richard V. Gaines 766
Some free energy values from geologic relations....R. M. Garrels 780
Bikitaite, $LiAlSi_2O_6 \cdot H_2O$, a new mineral from Southern Rhodesia....
....Cornelius S. Hurlbut, Jr. 792
Zincian and plumbian dolomite from Tsumeb, South-West Africa....
Cornelius S. Hurlbut, Jr. 798
Three occurrences of high-thorian uraninite near Easton, Pennsylvania....
....Arthur Montgomery 804
The silica budget in the sedimentary cycle....Raymond Siever 821
The graphical analysis of mineral assemblages in pelitic schists....
....James B. Thompson, Jr. 842
Ionic diffusion and the properties of quartz. (1) The direct current resistivity....
....Henry E. Wenden 859
Preliminary report on the mineralogy and petrology of some marine bottom samples off the coast of Peru and Chile....E-an Zen 889
Notes and News: Hydrothermal synthesis of monazite....John W. Anthony 904
Studies of uranium minerals (XXIII): Torbernite, zeunerite and uranospherite
....Robert M. Berman 905
Identity of pilbarite with thorogummite and kasolite....Russell M. Honea 908
Unit cell and space group of larsenite, $PbZnSiO_4$....Frederic G. Layman 910
Notes on a peralkaline granite from Cashes Ledge, Gulf of Maine....
....Priestley Toulmin, III 912
Book review.... 917
New mineral names.... 919
Index to volume 42; Title page; Table of contents.... 922
